

Where should I go for dinner?

Let us point you in the right direction!

Who is the app for?

Working professionals

- > have some disposable income
- > in the city for work or events
- > know what they feel like eating but don't always know where to get it

Retired people

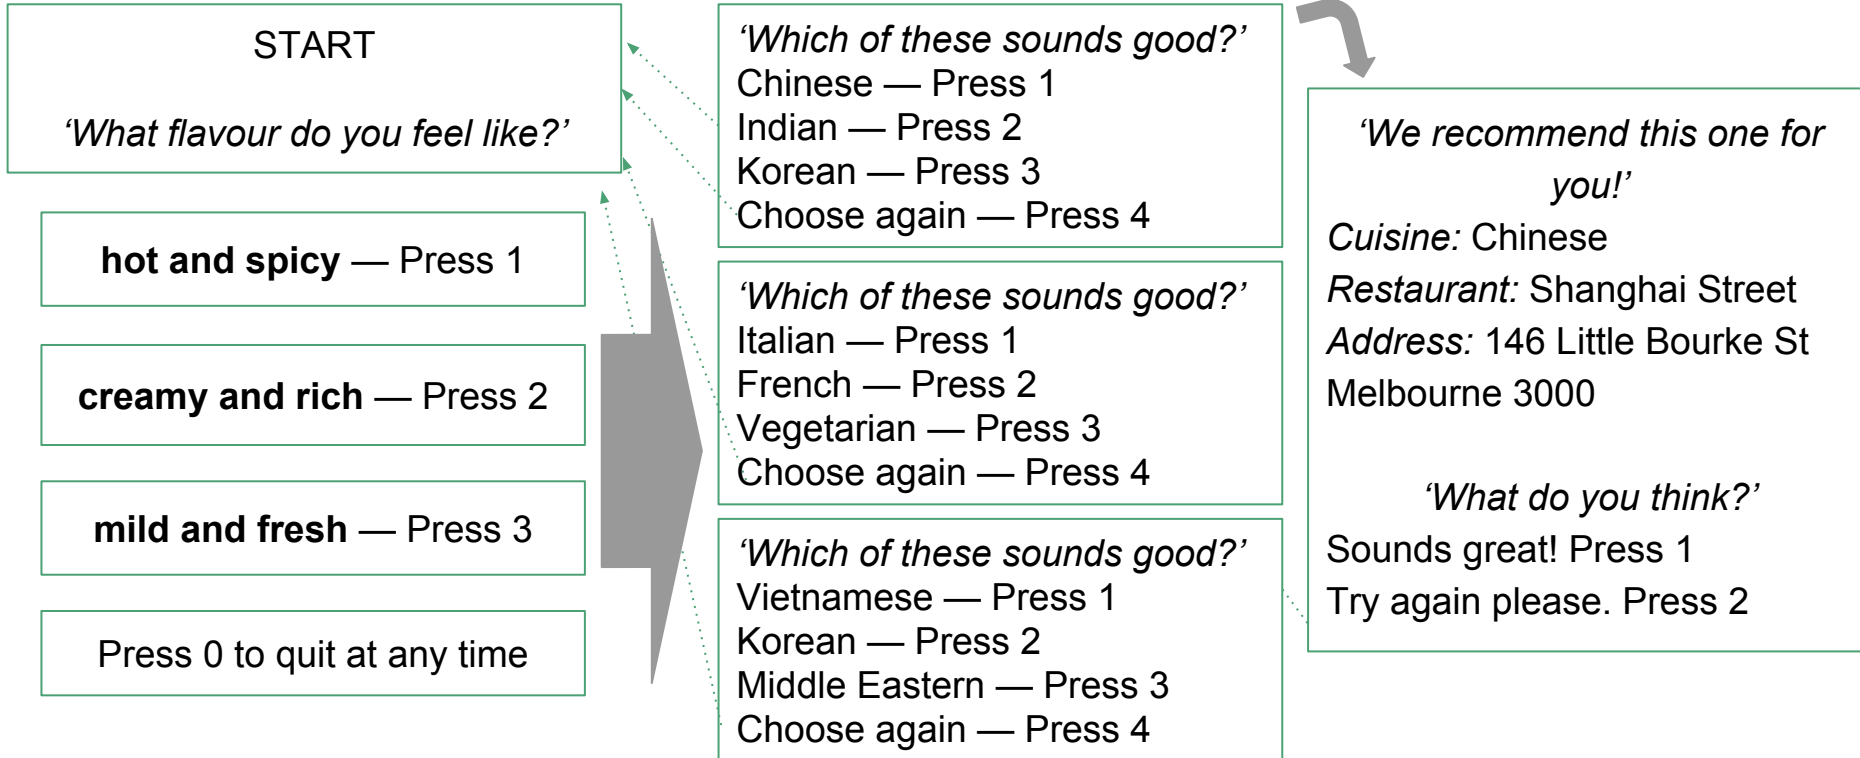

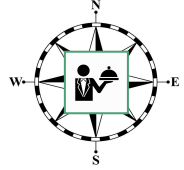

- > have disposable income
- > in the city for a concert or a convenient meeting place
- > want an easy way to see where the food they like is in the CBD

Events organisers

- > have a company budget
- > need to choose place in CBD for company and team dinners
- > wants to choose something that will make most employees happy

Task flow diagram

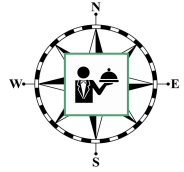

Outside of scope

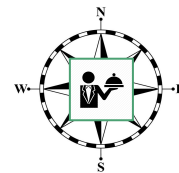

- Restaurant phone numbers
- Restaurant hours
- Geolocation
 - Would add data privacy concerns (location sharing)
 - Ethical considerations for this not an issue with current design of app

Potential future extensions?

Pffft...

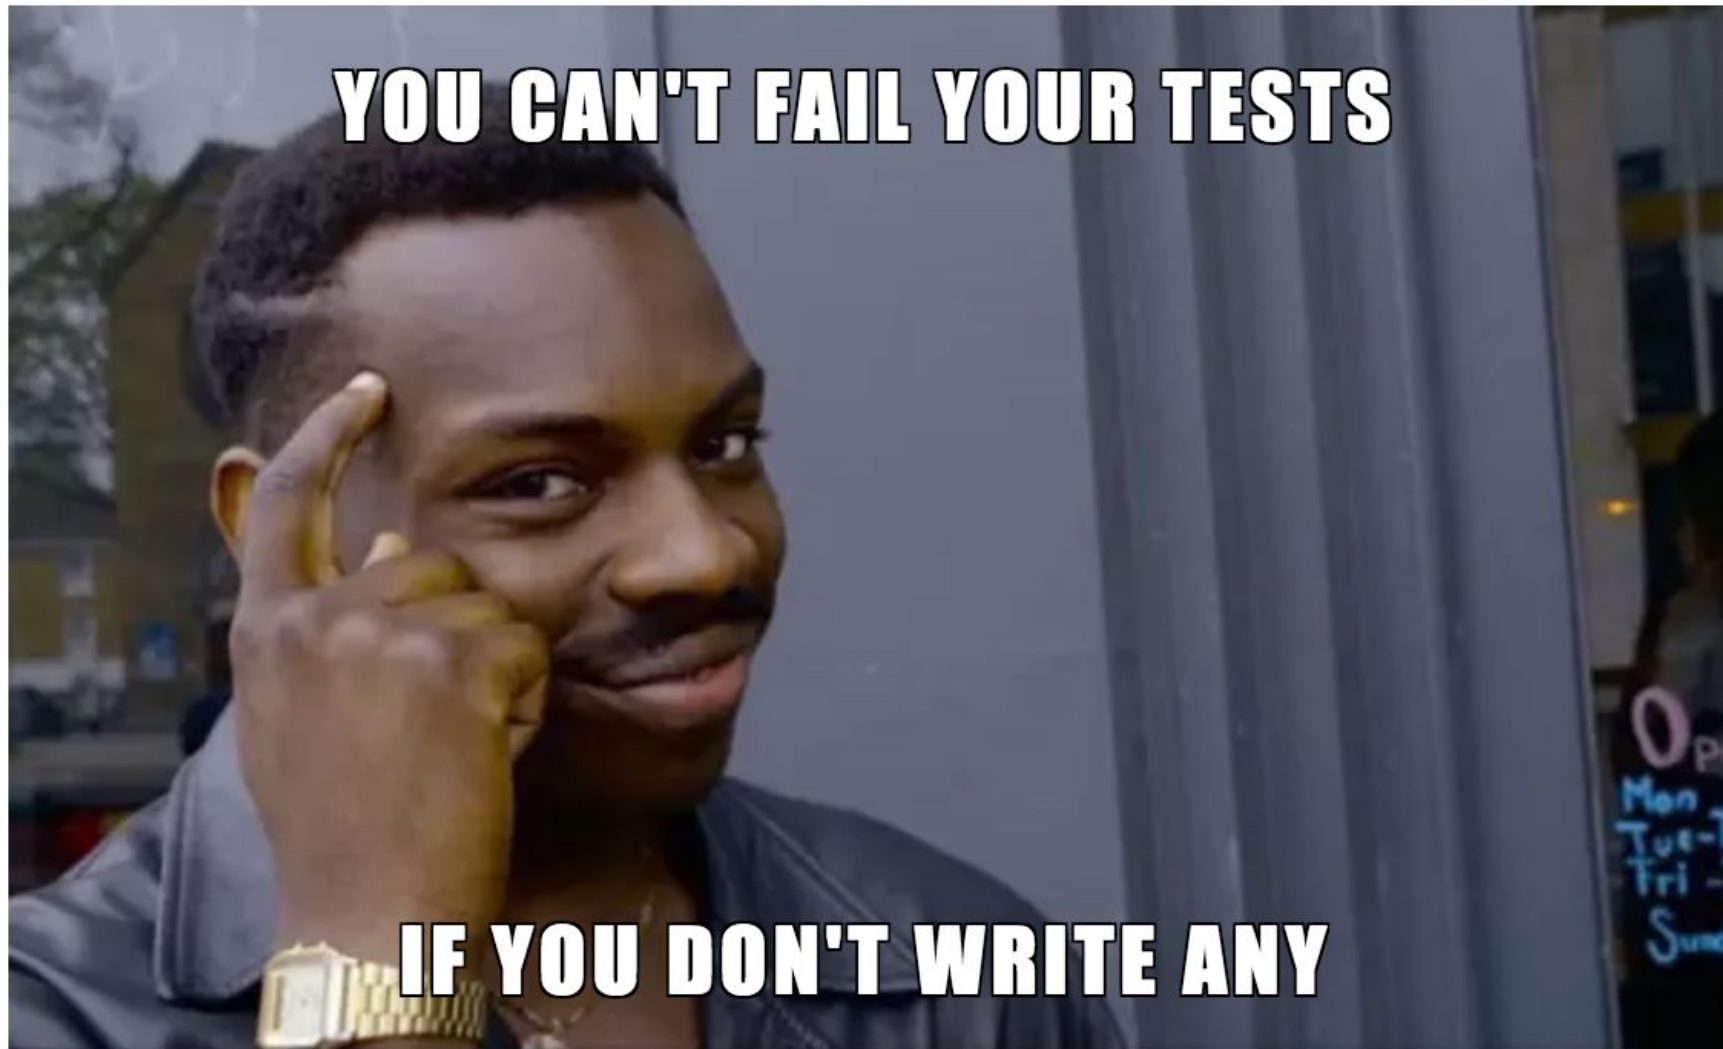

As if it's that straightforward.

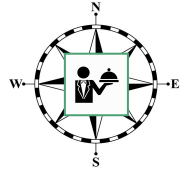

YOU CAN'T FAIL YOUR TESTS

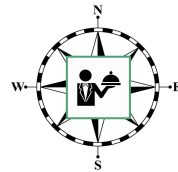

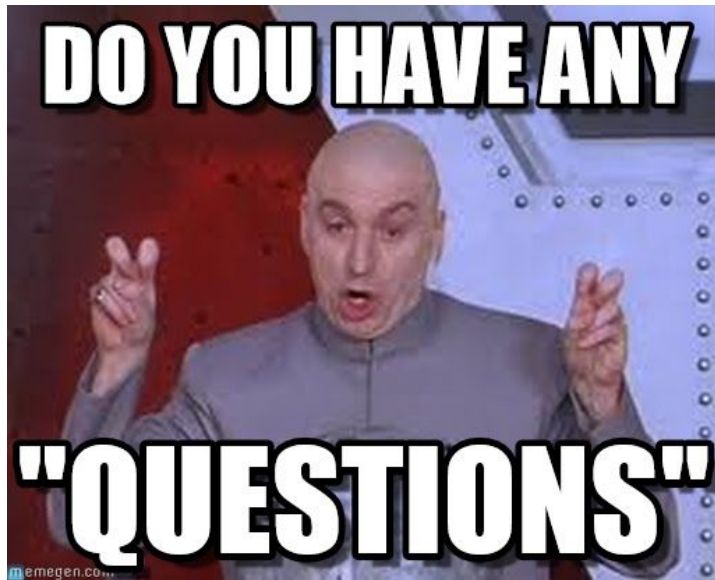

IF YOU DON'T WRITE ANY

The fun part!

DEMO TIME
